Dermatology - 2

Dermatological issues are some of the most common conditions encountered by health professionals in the NHS today, affecting patients of all ages. Though many are not life-threatening, their psychological impact on patients can be high and can also lead to longer-term health issues if left untreated. Accurate diagnosis is therefore critical. We have provided a list of relevant articles from MA Healthcare journals dealing with this area, thereby providing your staff with research, information and tips that will support both their work and the quality of care for their patients.

British Journal of Child Health

 Girlguides' awareness of and attitudes towards sun risks and sun-protective behaviours Published Online:16 Jun 2021 <u>https://www.magonlinelibrary.com/doi/full/10.12968/chhe.2021.2.3.129</u>
