NHS Knowledge & Library Hub

EBSCO Discovery Service provides you with an easy, yet powerful, means of accessing all of an institution's information resources through a single search. This is achieved by harvesting metadata from both internal (library) and external (database vendors) sources, and creating a pre-indexed service of unprecedented size and speed. Although the resulting collection can be massive in size and scope, the fact that it is indexed locally (on the EBSCOhost® servers) allows for exceptionally fast search response times.

Login with OpenAthens (yellow band at top of screen, displayed once you have clicked 'Start your search' - shown on the first image above) to access your local resources.
