Dementia/Alzheimer's

May 2022

Dementia and Alzheimer's are key public health priorities, having significant impact not just on patients but also their family members, friends, and carers. Healthcare professionals today therefore need to be aware of the many complex factors that are involved in the diagnosis and care of those affected. We have provided a list of recent and relevant articles from MA Healthcare journals dealing with this area, thereby providing your NHS staff with research, information and tips that will support both their work and their patients.
