

Nursing Dept.,
County Hall,
Northampton.

August 13th. 1958.

Dr. Pleydell is anxious not to miss any stillbirths or births of abnormal children however slight occurring in the County. He wants to see the Antenatal notes of all these cases. To prevent the Antenatal notes going astray, it has been decided that the Antenatal notes of all such cases should be collected when the routine Midwifery inspection is being paid and the nursing of the Mother has been completed.

The Midwifery Supervisor will bring the Antenatal Notes in to the Office and pass them to Dr. Pleydell, who will be responsible for returning them to the Midwife concerned.

W. M. WILLIAMS.

Superintendent Nursing Officer.
