## Dermatology - 3

Dermatological issues are some of the most common conditions encountered by health professionals in the NHS today, affecting patients of all ages. Though many are not life-threatening, their psychological impact on patients can be high and can also lead to longer-term health issues if left untreated. We have provided a list of relevant articles from MA Healthcare journals dealing with this area, thereby providing your staff with research, information and tips that will support both their work and the quality of care for their patients.
