

## Respiratory Conditions

Tackling respiratory conditions in the population is of a critical focus, as they form some of the biggest causes of death in the UK as well as significantly impacting upon healthcare costs, winter pressures and productivity. With the right knowledge, health professionals can work towards improved diagnosis and help patients manage their conditions effectively. We have provided a list of relevant articles from MA Healthcare journals dealing with this area, providing your staff with research, information and tips that will support both their work and the quality of care for their patients.

The articles below exclude coverage of COVID-19. All MA Healthcare articles relating to COVID-19 are still free to access via the following link: <https://www.magonlinelibrary.com/coronavirus>

### British Journal of Community Nursing

- Measuring oxygen saturation in homecare
