

Women's Health

Across all healthcare settings, health professionals will encounter conditions and cases unique to their female patients, ranging from maternity care, reproductive health to cancer. With greater understanding of their experiences, professionals can ensure women are treated with the highest level of patient care. We have provided a list of relevant articles from MA Healthcare journals dealing with this area, providing your staff with research, information and tips that will support both their work and the quality of care for their patients.

British Journal of Community Nursing

- Using thermal imaging to measure changes in breast cancer-related lymphoedema during reflexology
