Journals for Rheumatology and immunology

This leaflet lists the journals related to rheumatology and immunology to which we have access—either to the current issue or to issues as they are made available after an embargo period (publisher’s embargoes vary between 2 months and 3 years.)

Some of the journals will be available on open access but others will require an OpenAthens login.

If you would like us to set up email alerts to any titles so you receive notification of the contents of the journal as it is published please let us know. If a journal of particular interest to you is not included on the list below we can still set up an alert for you, and obtain articles you would like to read in full from other libraries (subject to copyright).

### Accessing journals via NICE Evidence

1. To access the NHS Athens resources type [http://www.evidence.nhs.uk](http://www.evidence.nhs.uk) into the address bar of your browser:
2. Select Journals and Databases
3. Scroll down to Journals and select ‘Sign in to Open Athens …’
4. Enter your Athens login details
5. Search for a journal by selecting ‘All words in title’ and putting in some or all of the title.

**Note:** orthopaedic will not automatically bring back titles containing the word orthopaedics so you need to do separate searches for word variations.

If you are struggling with getting fulltext articles or need an article in a journal to which we don’t subscribe please ask the Library Service—either email library.index@kgh.nhs.uk, tel x 2862 or use our online request form [http://www.surveymonkey.com/s/THV5X9L](http://www.surveymonkey.com/s/THV5X9L)

Guides on how to search the databases are available from the library service. We also provide individual and group training sessions.

</table>

This list is not comprehensive, and does not include titles to which we can access archive material despite not having a current subscription, so if you are looking for a particular article always check first at www.evidence.nhs.uk—see overleaf for further instructions.

If you experience problems with accessing a particular journal please contact us.
