## TRIP Database

### What is it?

Trip (Turning Research Into Practice) is a clinical search engine designed to allow users to quickly and easily find and use high-quality research evidence to support their practice and/or care.

Trip has been online since 1997 and in that time has developed into the internet's premier source of evidence-based content. Their motto is 'Find evidence fast' and this is something they aim to deliver for every single search.

As well as research evidence they also allow clinicians to search across other content types including images, videos, patient information leaflets, educational courses and news.
