

Diabetes

Relevant articles from MA Healthcare journals to support your staff's education and practice

April 2018

With approximately 4 million people in the UK affected, diabetes is one of the fastest growing health concerns of our times and an urgent public health issue. As the number of people with diabetes increases, the challenge for healthcare professionals to deliver optimum care for patients and understand the complexity of the condition becomes ever greater.

We have provided a list of relevant articles from MA Healthcare journals dealing with the condition, thereby providing your NHS staff with research, information and tips that will support both their work and their patients.
