

## Library Training Dates

**Do you ...** want to look beyond your reading list?  
have a patient with an unusual condition?  
need the latest evidence to support a guideline/policy?

**Are you ...** embarking on a literature review?  
not sure how to judge the validity of a paper?  
uncomfortable interpreting statistics?

**Our training sessions can help you identify articles and evidence quickly, and build your confidence in assessing the worth of a study.**

**Literature Search:** - how to construct and apply a search strategy to identify literature on a topic using the interface provided through NICE Evidence to the major healthcare databases.

**Critical Appraisal:** - an overview of the different types of study, what to look out for when reading a paper, tools to help and how to interpret the key statistics – and the appraisal of an example paper.

If you prefer we can visit your workplace to run 1-1 or group sessions.

Session Title	Date	Time	Venue
